This is purely a sticker activity book. I think I got confused after reading descriptions of the many different activity books I saw because I was expecting something with a few different types of activities, something to keep my son occupied for a an hour or two everyday for the vacation week. I have been through the book and it has sticker activities (stick flies on spider web, match the shape and put a sticker on, stick animals in the watering hole). It is not especially challenging since the stickers are in sections for particular pages. It has a few mazes and some drawing/coloring activities. Nothing that would help with spelling or math. It will be a great gift for someone who loves

playing with stickers or someone interested in reading animal facts. Great quality - pages are thick, good stickers, and the design and print is amazing. Update: I realized that I missed the book preview on this. Upgrading to 5 stars because it was my fault for not checking what was advertised and my son definitely had enough fun for the money I spent. I wish I'd found this when he was younger and obsessed with stickers. A much better option than regular sticker sheets.

My 5 year old son received this as a birthday gift and loves it! He is able to sit and work on it himself and enjoys learning about the animals and doing the stickers and activities. We have a few of these books and I would highly recommend them!

My daughter purchased this book and plowed through it. It was the only thing she wanted to do all day ... read, do the activities, and decorate the pages. She learned a lot in the process, too! I love this series of books because kids aren't really aware they are learning so much information ... everything is presented in fun and engaging ways.

My son LOVES puzzles, and he is 7 now. He got this for his birthday, and did not want to do anything else. He was absolutely in love with all the mazes, pictures, and stuff you can do in there. Great product. If your child loves more than just coloring or drawing, but loves the puzzles, and much more, than definitely get this book. It is a lot of fun.

A lot of small stickers. I bought the book solely for the stickers because my one year old loves stickers. When they say 1000 there is that many but some of them are the size of a hole punch.

This kept my 6 year old busy on the 3 hour airplane ride. He needed some help with it occasionally, but kept him very occupied.

I'm ordering this sticker book for a second time, it's that good. The Nat Geo brand stickers have been the best for my toddler. They are easy enough to peel off, so she doesn't get frustrated. And they aren't too sticky, so she can move them over and over without them ripping. And that also means they don't get stuck on unwanted surfaces.

Gave this to my 3.5 yr old for a road trip a few weeks ago and it's still his favorite thing! He carries it around, doodles in it, puts stickers on the pages and even sleeps with it. It's always hit and miss

with kids, who knows what they'll fall in love with, but this workbook is a hit! To comment on the actual product, it had lots of colorful pages and tons of cute stickers. Most of the activities such as the mazes are better for 4-5 yr old but a younger kid can find plenty of entertainment with it too!
