About Birds: A Guide For Children, 2nd Edition

Synopsis

This kid-friendly book offers a first thoughtful glimpse into the world of birds: from eggs to nests, from song to flight. In this delightful book, teacher and birder Cathryn Sill explains to children what birds are, what they do, and how they live. Accompanied by beautifully detailed illustrations from noted wildlife illustrator John Sill, About Birds is a first thoughtful glimpse into the world of birds, from eggs to nest, from songs to flight. Simple and enlightening, About Birds tells children what is essential for understanding and appreciating birds. An afterword provides further detail for youthful ornithologists and their parents regarding bird identification. About Birds will faithfully answer the first questions of young ornithologists and charm adults with the wonder and diversity of this important species.

Age Range: 4 - 7 years

Grade Level: Preschool - 3

Customer Reviews

I looked around a lot for a bird book for my son/his dad who love to watch the birds together. I purchased this after reading another review so I felt that I should give my own. Considering how difficult this book was to find, it was definitely worth the wait. My son is 21 months and just loves reading the "Birdee Book". The pictures are beautiful and the written text is short and sweet which is perfect for young children. I also feel that it is doing a great job of teaching him the difference between birds in the sense that there are ducks, geese, birds, etc.. and prior to this book all of them

were just "Birds". I would recommend this for any child above 18 months.

This is such a pretty simple book. The pictures are lovely and the writing is perfect for the youngest children. This book is best for kids between 3 and 6 years old.

I bought this book for my granddaughters. They have loved it from the 2 yr. old to the 8 year old. I enjoyed it,too. The sounds brought memories of birds I'm familiar with.

Fantastic book for toddlers to introduce birds. We have several of the Audubon plush birds that play the real bird calls, and our daughter loves to read this book with "her" birds. The whole series of books is excellent; highly recommend amphibians, reptiles, mammals, etc.

Don't be dismayed by the few words - each caption carries a complete idea that will spark more questions and thinking, especially as it relates to the beautiful picture. The additional information in the back extends each idea, with challenging vocabulary and will encourage comparative thinking. It may seem simple to an adult, but it's spot on for a young child who is interested in birds. A really fine book for children. Highly satisfying for beginning readers.

We recently bought this book for our 15-month old nature fanatic, and he loves the illustrations as much as we do! It is so delightful to finally find a series that has artful, accurate illustrations accompanied by text that is simple enough to hold our little one's interest. I plan to buy more books from this series and certainly recommend this book to anyone that loves birds, art, and/or nature. Follow-on review: Our son is now 24-months old and still loves this book. It really is a treasure - you won't be dissapointed!

I got this book for my 20 month old who could watch the birds outside all day. She LOVES it! The pictures are all drawings but realistic and not cartoon-y at all. The text is simple on each page (ex "birds come in all sizes") but is expanded upon a little in the back of the book (ex the length and wingspan of each bird is listed) with a thumbnail of each picture. It may be too young for school aged kids but for toddlers/preschooler it's fabulous.

I bought this book for my 6 year old grandson. We enjoy watching birds and I want him to start labeling them, not just saying "that's a bird". This simple book also has few activities for youngsters

to do with an adult, like a bird feeder. The explanations are simple and to the point and the illustrations are well done. I recommend this book not only for kids, but for adults starting birding or enjoying them with their grand kids.
