Building Thinking Skills® Level 3 Verbal

Synopsis

(Grades 7-12+) Building Thinking Skills® provides highly effective verbal and nonverbal reasoning activities to improve students'™ vocabulary, reading, writing, math, logic, and figural-spatial skills, as well as their visual and auditory processing. This exceptional series provides a solid foundation for academic excellence and success in any assessment. The activities are developmentally sequenced. Each skill (for example, classifying) is presented first in the semi-concrete figural-spatial form and then in the abstract verbal form. Students learn to analyze relationships between objects, between words, and between objects and words as they: observe, recognize, and describe characteristics. distinguish similarities and differences. identify and complete sequences, classifications, and analogies. These processes help students develop superior thinking and communication skills that lead to deeper content learning in all subjects. Teaching Support Activities are modeled to reinforce skills and concepts. An answer guide is now included, however, a separate Instruction/Answer Guide is also available but is not required. The optional teaching guide includes objectives and focus questions that reinforce analytical skills.

I bought this to use as a supplement for my 10th grade daughter. I just needed her to think and

maybe use some skills that she wasn't really having to use with typical curriculum. While I think it is a great book and some of the activities are very thought provoking, I do not feel like you could use this as a stand alone curriculum for a student. The website and the representative I spoke with both implied that it could be used alone and I think that is very misleading. If you just need some added activities to stimulate thinking skills, this is a great companion BUT if you are looking for a stand alone curriculum, this is not it.

Challenging book -- we used this as a summer study tool for my daughter, who is entering 7th grade and takes honors classes. For grades 7-12, and it was definitely a challenge but doable. The problems really do require thinking and the answers are not obvious. I think this book will definitely help with standardized test practice.

Really good book as described condition and shipping was awesome from Lampost.I - and my kiddo- like this better than the Building Thinking Skills 3 - Figural.

We are using this with 5 of my kids this year. It is challenging and I think will be very helpful. I'm very glad I got them.
