# TIME For Kids Book Of Why: Really Cool People & Places

## Synopsis

TIME for Kids The BIG Book of Why: People and Places answers the why, what, when, where, who and how questions about people and places in history that kids commonly ask, but adults can rarely answer. Why did the Maya build pyramids? Did Vikings really have horns on their helmets? Why did Christopher Columbus sail to America? Why did the Titanic sink? Why is the London Bridge in Arizona? Written in an upbeat manner, each answer is accompanied by either a photo or an illustration to show the reasons why. Of course, TIME For Kids goes beyond answering the question, and dips into the science or history to further explain the answer in an easy-to-follow, straightforward manner. TIME for Kids The BIG Book of Why: People and Places is a must-have book to satisfy the most curious of kids.

## Book Information

Lexile Measure: 1010 (What's this?)

Series: Time for Kids Book of Why

Paperback: 48 pages

Publisher: Time For Kids (May 6, 2014)

Language: English

ISBN-10: 1603209840

ISBN-13: 978-1603209847

Product Dimensions: 8 x 0.1 x 8 inches

Shipping Weight: 2.4 ounces (View shipping rates and policies)

Average Customer Review: 4.8 out of 5 stars Â Â See all reviews Â (16 customer reviews)

Age Range: 9 - 12 years

Grade Level: 3 and up

## Customer Reviews

This book was written for children but as an adult I learned so much. The content has some difficult words so an older child could read it independently but a younger child would certainly enjoy this with an adult reader. I thought it was interesting that the Viking Lief Erickson landed in America in 1002 hundreds of years before Christopher Columbus was given the credit for that endeavor. I did

not know the first book printed by the Gutenberg Press in 1440 was the Bible. Some guess he produced 180 copies and some are still in existence. So much information but this last one I am sharing because I have ridden across the bridge in San Francisco, CA. The Golden Gate Bridge can swing sideways up to 27 feet. The builder, Joseph Strauss, made sure it could withstand earthquakes and high winds. Whether you are a child or an adult, I believe you will enjoy reading this book.\*I received this post for review - all opinions are my own\*

These are the kinds of books that I like to keep in my car for trips even though our big children are grown. They are interesting and this one is especially. As a retired elementary school librarian (preK - 8), I thoroughly enjoyed sharing this book and these types of books with the students. It was a fun and easy way to pique the interest of a reluctant reader. My own children enjoyed these books and we still have fun with them. This one is excellent.

Great information book for kids! Lots of colorful pictures and fascinating information!

This was for my granddaughter and she loved it.

way to go this was great!!!!having a great time with my sister's it is so fun to read together !not with myself! it is boring!!!

My son found this book very interesting. He learned a lot by reading it, and he actually enjoyed learning.

My students love this book collection. Everytime it is reading time they grab all of these!

Is very important being able to answer as many questions the children have!!!
