Listen Up!: Alexander Graham Bell's Talking Machine (Step Into Reading)

Synopsis

IT'S 1876 AND THE whole country is celebrating the 100th birthday of the United States. The biggest party is in Philadelphia at the World's Fair, where the latest and greatest inventions are on display for all to see. Alexander Graham Bell is headed to the fair to demonstrate his invention - a talking machine he calls the telephone. But will anyone come to see him at the world's most important science fair? And more importantly, will his machine work? This Step 3 reader celebrates the resilient, quirky spirit of inventors.

Age Range: 5 - 8 years

Grade Level: Kindergarten - 3

Customer Reviews

This was a great book for my class to read aloud. It's easy enough for them to understand and they love being able to tell about a person using expression they can read. Thank you for your prompt delivery.

I have read and re-read this story with my son who loves trying to figure out how things work. It is a good way to take an understanding of how tin cans transmit sound and apply it to how telephones first began.

I bought this book for my grandson who loves to read, but sometimes gets discouraged by the length of "chapter books." Most shorter books at this reading level are fanciful fiction. This book is not too long, and it's informational as well. He loved reading about a "real man" who invented a "machine" we use daily.

I love these series. But most important that my son does. I order 20+ books and he loves to read them (usually it is not that easy to make him read). I got mix of 2-3-4 levels for the second grader, second level is too easy, but it creates some fun and he reads them with pleasure. Love it, I would recommend it.

Bought this book for my two year old. He loves reading it as it is very kid friendly and as a bonus, gets to learn some new and factual information.

My girls love this book. It is easy to read for my daughter in 1st grade and creates a good teaching moment.

Great learning book for my son. New Book with wonderful information to easily understand. We have ordered more like this book.

My five-year-old loves science and inventors. He loves this book, and we read it together often.
